

Introducing

LSI Logistic Solutions Ireland

LSI Logistic Solutions was incorporated in 2003 to meet the growing need for a professional vendor who could engineer and implement bespoke logistic solutions.

At LSI we are continually developing multi-modal transportation solutions from the planning stages to the actual operation ultimately through to the final invoice.

With niche market concentration and a strong focus on individual client requirements our business has increased annually both domestically and internationally. Our senior management have a minimum of 20 years experience each in the freight/logistics industry.

Our operation is structured to allow maximum flexibility whilst ensuring consistent and professional services of the highest attainable levels

Logistic Solutions Engineered for You.

Mission

LSI shall continually strive to develop advanced, innovative and cost effective logistical solutions for each of our clients and partners."

Logistic Solutions Engineered for You.

Quality

The quality policy within LSI Logistic Solutions Ireland Limited is to achieve and maintain a standard of service, which not only compares with but exceeds that of our competitors both nationally and internationally.

Our board of Directors has the overall responsibility for our system designed to achieve this objective. This system provides for establishing and reviewing specific quality objectives and not only meets but exceeds the highest industry requirements and policies of best practices. All of our employees are keenly aware of our quality objectives, their responsibilities and obligations with regard to our system.

LSI Logistic Solutions Ireland Limited recognizes the need for continuous improvement in our services and encourage our customers to bring any aspects of our service that do not meet their quality expectations to our attention.
